CUSTOMER CASE STUDY: VEDUM KITCHEN & BATH

HelgeNyberg

THREE GENERATIONS OF TRUCKS IN VEDUM

In the warehouse building at Vedum Kitchen & Bath, three generations of trucks from Helge Nyberg AB share the site. The oldest one is over 20 years old and, of course, looks a little tired, and the personnel are laughing a bit while driving. But it's still going strong.

VEDUM

Vedum Kitchen & Bath is a family business that started in 1919 in a small town in the West countryside. They manufacture and sell kitchen, bathroom and laundry facilities.

Straight through the town runs Älvsborgsbanan, a railway that goes between Uddevalla and Borås.

When Vedum Kitchen & Bath grew, they needed to build a new warehouse of 11,000 sqm, and they saw no other way than placing it on the other side of the railroad. Therefore, the material is now being transported from the production to the warehouse on a bridge over the rail.

Long cooperation

When the new premises were built, more space was created for production, thus increasing capacity and making handling of stock and outgoing delivery more rational.

At this stage, more trucks were needed and since the cooperation with Helge Nyberg AB extends over 20 years, it was natural to expand with a third generation of forklift trucks.

Tomas Berg is delivery manager and he is very pleased with the electric trucks.

– We bought new forklift trucks to the warehouse, but also a new towing tractor solution, that was new to us, Tomas Berg says.

After the towing tractors, large trolleys are connected. These trolleys are designed to be able to handle the very long material that are picked up. The trolleys are driven to the packing department, where they are disconnected and waiting for packing.

Kitchen and bathroom

When the material from the production enters the warehouse, it is placed on shelves. From here, each order is picked, then packed

” Everything has worked out very well. Right from the start.”

Tomas Berg, delivery manager

and sent to the customer.

An order can for example consist of two bathrooms and a laundry room that is to be delivered to a house manufacturer or eight kitchens to a rental property of a construction company.

The products picked from the shelves are often big and heavy, therefore it requires a trolley and truck that can handle the load.

Safe quality

The trucks has the forks pointing backwards

and they are designed with quiet and reliable lift for handling loads up to 500 kg.

– Right now we have one of our older trucks on service, but that’s probably the first time, says Tomas Berg, smiling.

– Everything has worked out very well. Right from the start.

20% increase

Vedum has about 450 employees and they produce about 7,000 cabinets a week.

It is a 20 percent increase over the last th-

ree years. They run 3 shift, with full production under two of them and one reduced shift at night.

One of the reasons for the positive figures is the increase in sales in the webshop. Here the products are also sold directly to the final consumer.

– This means that the single-piece picking is increasing and when the computer system is running like it’s supposed to, we will be able to increase the rate even more, says Tomas Berg.

The trolley that is connected to the towing tractor is extra large to accommodate the long kitchen details.

The label printer is located on the side of the forklift or on the backrest.

CONCEPTS FOR MANY AREAS

With more than 50 years combined experience and knowledge of our customers needs, we have chosen to specialise in a number of different areas. In this way we can offer the most optimal solutions, the best service and the most secure collaboration.

INDUSTRY & MANUFACTURING

Helge Nyberg AB is active within both light and heavy industry. We have industrial solutions for the whole of the materials flow.

E-COMMERCE & ORDERPICKING

Our long history and geographical position in an area with many mail order, logistics and warehousing businesses gives us unique knowledge and experience in order picking and third party logistics.

HEALTH CARE & HOSPITAL

All industries have different requirements and specifications in terms of material and tools. Naturally, the strictly regulated field of health care has its own particular requirements. We can satisfy these.

AUTOMOTIVE & VEHICLE

The automotive industry is perhaps the sector in which the development of intelligent logistics has gone furthest. Solutions from Helge Nyberg are part of this development.

SERVICE & SUPPORT

Our forklift and trolley solutions are not only perfect for transporting baggage or material, for example in airports or trade fairs. Our solutions are equally often used as mobile service offices by technicians and installers in industry and other places.

LEAN SOLUTIONS

As specialists, we are happy to help you develop the material handling solution that uses the least resources and creates the most value – the right material, in the right place at the right time.
