

E-COMMERCE & ORDER PICKING

CUSTOMER CASE: POSTNORD LOGISTICS TPL AB

HelgeNyberg AB

ORDER PICKING MADE EFFICIENT WITH MANUAL TROLLEYS

Postnord Logistics TPL AB, within Third Party Logistics, are the largest in Sweden and a significant distributor in the re-regulated pharmacy business in Sweden. With manual trolleys, approximately 100,000 order lines are picked every week. The constantly increasing efficiency is largely due to the fact that Postnord Logistics TPL AB are in the forefront with logistic solutions in their warehouse and in their order picking process.

Improved Ergonomics

Today, the work is easy for the person picking orders. No lifting over shoulder height, the possibility of filling the trolley from both sides, and being able to handle a maximum number of orders for each picking round. It's also easier to keep the premises clean, since empty packaging can be placed on the trolleys.

Helge Nyberg AB Sees the Big Picture

"Helge Nyberg does not only sell products, but works actively with developing total solutions that fit our business. We made a thorough evaluation of several suppliers, where the choice of Ergobjörn Trolleys from Helge Nyberg provided the best solution for meeting our customers' needs", says Bengt Ydebäck, Logistics Division Manager. "Our personnel appreciate the new trolleys which are narrow, smooth

The personnel cares for one trolley at a time. They fill it up, pick orders and then empty the trolley at a conveyor band.

and easy to handle. Above all, they are very easy to turn around, even in very narrow spaces", he continues.

Efficient Flow

Production planners make sure the system creates the most optimum picking orders possible.

www.helge-nyberg.com

The person picking orders takes a couple of order lists, fills up the trolley with boxes and begins the order picking process.

The different product categories are placed in different zones. The trolley is then emptied at a conveyor band with direct connection to the loading area where the boxes are consolidated to entire shipments for each store.

By using scanners and in-house control systems, quality is guaranteed both in the picking process and for the entire flow.

Stongly Increased Productivity

Productivity has increased significantly since starting to use the Ergobjörn Trolleys. "There is a continuous need for increasing capacity and it is important to maintain high productivity", says Bengt Ydebäck, Logistics Division Manager. The range is growing with approximately 100 articles every week. New logistics projects are already in line and smart replenishment of goods is the coming focus.

When full with orders, the trolley is emptied smoothly and ergonomically at a conveyor band with direct connection to the loading area.

Most of the time there are several trolleys in the aisles. A well thought-out warehouse solution is crucial.

CONCEPT FOR MANY AREAS

Over 50 years' collective experience and knowledge of our customers' needs we have specialised in a number of areas. This allows us to offer the optimum solutions, the best service and the most secure collaboration.

INDUSTRY & MANUFACTURING

Helge Nyberg operates in both light and heavy industries. We have industrial solutions for the entire material flow.

E-COMMERCE & ORDER PICKING

With our long history and our location in a geographic area that is dense with mail order, and logistics and warehousing businesses, we have unique know-how and experience regarding order picking and third party logistics.

HEALTH CARE & HOSPITAL

All industries have different requirements and specifications regarding materials and professional equipment. The strictly regulated health care sector has certain specific requirements. We can meet these requirements.

AUTOMOTIVE & VEHICLE

The development of smart logistics is perhaps most advanced in the automotive industry. Helge Nyberg's solutions are part of this development.

SERVICE & SUPPORT

Our truck and trolley solutions are not only ideal for transporting baggage or materials, for instance at airports and trade fairs. They are just as frequently used as wheeled service points by technicians and installers, for example in factories.

LEAN SOLUTIONS

As specialists, we are happy to help you develop the most resource-efficient solution to your material handling needs – the right material, in the right place at the right time.
